

2025 Prison Rape Elimination Act (PREA) Annual Report

VISIONQUEST NATIONAL, LTD

Introduction

The Prison Rape Elimination Act (PREA) was enacted in 2003 to eliminate sexual abuse and harassment in confinement settings. PREA's implementing regulations, the "Final National Standards to Prevent, Detect and Respond to Prison Rape," were published by the Department of Justice (DOJ) and became effective on June 20, 2012. This federal act mandated compliance for juvenile programs starting August 20, 2012.

VisionQuest is committed to full compliance with PREA standards to ensure the safety and well-being of the youth in our care. Historically, VisionQuest has reported and maintained records of all abuse allegations, exercising many PREA practices prior to its federal mandate. This proactive approach has facilitated the gathering and assessment of data as prescribed by PREA standards.

Agency Description

VisionQuest offers residential, community, and in-home programs to youth and their families in Arizona, Delaware, Maryland, Pennsylvania, and Texas. These programs serve youth and their families in both the child welfare and juvenile justice systems, including youth with mental health and substance abuse diagnoses.

For the 2025 reporting period, VisionQuest Delaware operated two 10-bed Residential Alternative to Detention (RAD) programs serving male and female youth from January 1 through November 21. After the Milford program closed, Delaware continued operations with a single RAD program located in Newark. To maintain compliance with PREA requirements, juvenile residential facilities such as those run by VisionQuest undergo audits every three years. The Milford RAD received its most recent PREA audit in 2025, while the Newark RAD last completed its audit in 2024.

In addition, VisionQuest operated Morning Star Youth Academy, located in Maryland which is a 24 bed facility that provides 6-9 month residential programming. Youth receive substance abuse treatment services, relapse prevention, mental health and individual therapy, family counseling, health and wellness and medication management. The target population is young men ages 14-18 years old, who may also exhibit behavioral and psychosocial concerns. Morning Star Youth Academy will be undergoing its PREA audit and is scheduled to be completed in March of 2026.

Data Collection and Review

VisionQuest collects data on every allegation of sexual abuse and sexual harassment, regardless of the outcome of the investigation. Each allegation is reported to the respective state's child abuse hotline and law enforcement agencies. Upon completion of investigations, a review is conducted by facility administration and corporate members to identify and implement any necessary changes to policies or practices to prevent future

incidents. A report with findings and recommendations is produced and maintained on file.

Definitions
